COURSE TESTIMONIALS

"This workshop provided the land navigation skills that I needed to get ahead of the curve for testing for special forces." - Eric P. California

Thank you for your quick response. I really appreciated your patient explanation of map and compass work. - Black B. Virginia

"Thanks for your patience and skill...I got a lot out of the time together thanks to your skills at teaching and knowledge of the subject matter. The time was also thought provoking and I have a lot of things to work on. This was kick *ss! What do you think of a follow-up training?" - Hank C. South Carolina

"Rob's land navigation instruction is phenomenal. I was quite familiar with land navigation techniques before attending. He rapidly assessed my skillset, gave me a few additional tools, then taught me how to apply the whole "toolbox" during day and night movements. Teachers know course material but it takes a real professional to modify/adapt their material to exactly suit a student's needs. Thanks Rob, you exceeded my expectations." - Ben B. Physician

Thank you for all of you knowledge transfer and help with navigation last weekend. I had a lot of fun over the three days, and it really reinforced things and refreshed some of what I know. I took away a lot of information, and I really enjoyed your method of teaching. It's so much easier to learn by experience and have a small class so that the instructor can individually help the students. -- Christie H. - M.A.D.O.G.S.

The Land Navigation and Orienteering Course was excellent. As an Instructor myself it was a great opportunity to work in an unfamiliar territory on such an intensive course. I was impressed with how well the class was designed and the fact that we spent so little time in the classroom. I wanted to improve my skills and increase my proficiency. Your class far exceeded my expectations. I plan on coming back again just because it was so much fun. Thanks for a great class. -- Randall B. Virginia

Dear Prospective Student,

I strongly encourage you to contact the Natural Awareness Tracking School at your earliest opportunity. As you already know, there are many Tracking institutions throughout the United States. Mr. Rob Speiden however has been to almost all of these schools. He has invested copious amounts of time studying the most intimate details of both Human and Animal tracking techniques. The resources and network of highly trained professional trackers available to you through The Natural Awareness Tracking School are priceless.

Since that first class, I have remained in contact with The Natural Awareness Tracking School. I have met countless people through the School that share my interests and have helped me to grow as a Tracker. If you are interested in becoming proficient in either animal or human tracking, The Natural Awareness Tracking School is truly the place to "re-learn to see". I strongly encourage the prospective student to begin their journey with Rob Speiden and his excellent team of professionals. Respectfully, Fergus C.

Presents:

BASIC HUMAN TRACKING **(Sciences of Mantracking)**

“Tracking is the complex application of simplicities”. This course teaches the basic sciences of tracking skills as applied to detecting, interpreting, preserving and following sign of the passage of humans, be they lost, missing or evasive. These skills include recording tracks through sketching, measuring, photographing and casting. We will also look at aging and detecting sign that exists as invisible to the untrained eye but detectable by training and practice.

While this course is oriented to search/rescue, military and law enforcement professionals, it is also designed for individuals that want to round out their tracking skills. Students will need to be prepared to be outside all three days. Lodging and meals are not provided to keep the cost low.

Course dates: June 15-17, 2012 Course fee: \$225

Location: Christiansburg, VA Enrollment limited to 9

Topics covered will include:

✱ **Tracking tools** ✱ **Track measurements** ✱ **Individual identification from footprints** ✱ **Tracking humans on various ground covers** ✱ **Action indicators**
✱ **Aging footprints** ✱ **PLS/LKP approach** ✱ **Organization and functions of a tracking team** ✱ **Camouflage** ✱ **Night tracking** ✱ **Modern technology in tracking** ✱ **and more**

This course is taught by Rob Speiden, who has more than 15 years experience in tracking services including search and rescue. He has contributed to the successful conclusion of well over one hundred searches for missing persons in the mid-Atlantic region. Rob is the author of Foundations for Awareness, Signcutting & Tracking and currently teaches basic and advanced courses for the Virginia Department of Emergency Management Search and Rescue program and is founder of the Natural Awareness Tracking School. For more information please visit www.trackingschool.com Register for this course by submitting a registration form with your full course payment or a deposit of \$50.

Presents:

INTERMEDIATE HUMAN TRACKING

This course will continue to provide classroom and field training in techniques of human tracking including Detecting, Interpreting, Recording and Trailing. Specific emphasis will be placed on night tracking, detailed studies of human gait abnormalities and dozens of footprint sign indicators in various ground covers and how those change over time. We will also begin to incorporate signcutting strategies into trailing a person. This is not an entry level class, and students should have prior tracking training, though not necessarily from this school.

Course dates: August 31 - September 1, 2012

Course fee: \$225 Location: Christiansburg, Virginia

Enrollment limited to 9

Topics covered include the following: * Track recording ***** Individual identification from footprints ***** Animal tracking ***** Tracking humans on various ground covers ***** Action indicators ***** Aging footprints & sign ***** PLS/LKP approach and preservation ***** Organization and functions of a tracking team ***** Night tracking ***** Modern technology in tracking ***** Signcutting & Tracking Team tactics

This course is led by Rob Speiden, who has more than 15 years experience in tracking services including search and rescue. He has contributed to the successful conclusion of well over one hundred searches for missing persons in the mid-Atlantic region. Rob is the author of Foundations for Awareness, Signcutting & Tracking and currently teaches basic and advanced courses for the Virginia Department of Emergency Management Search and Rescue program and is founder of the Natural Awareness Tracking School. For more information please visit www.trackingschool.com. Register for this course by submitting a registration form with your full course payment or a deposit of \$50.

Presents:

ADVANCED HUMAN TRACKING (Arts of Mantracking)

This course gets in to the practices of tracking humans that cannot be read and learned from a book...that cannot be learned in a classroom. Most of the time in this course will be spent outside exploring and incorporating advanced human tracking skills. Experience in tracking is required, though not necessarily from this school. While this course is oriented to search/rescue, military and law enforcement professionals, it is also designed for individuals that want to round out tracking skills. Students will need to be prepared to be outside all three days.

Course dates: December 14-16, 2012 Course fee : \$225

Location: Christiansburg, VA Enrollment limited to 9

We will expand on material from Science of human tracking course by exploring the following subjects: Aging sign * Illusions and Perception * Signcutting * Mapping tracking tasks * Action Indicators * Tracking Team tactics * Making use of intuition * Tracking on difficult ground covers * Animal tracking * and more depending on students' interests.

This course is taught by Rob Speiden, who has more than 15 years experience in tracking services including search and rescue. He has contributed to the successful conclusion of well over one hundred searches for missing persons in the mid-Atlantic region. Rob is the author of Foundations for Awareness, Signcutting & Tracking and currently teaches basic and advanced courses for the Virginia Department of Emergency Management Search and Rescue program and is founder of the Natural Awareness Tracking School. For more information please visit www.trackingschool.com. Register for this course by submitting a registration form with your full course payment or a deposit of \$50.

Presents:

INTRODUCTION to ANIMAL TRACKING

What made that track, scat or other disturbance? Discover the many mysteries of the creatures that inhabit nature. This class will increase your awareness of and ability to find and interpret tracks and sign left behind by mammals, insects, birds and more. Students will need to be prepared to be outside for the day. With a mix of classroom presentation and a short field trip, topics covered will include:

- ✿ Track measurements
- ✿ Foot morphology
- ✿ Species identification from footprints
- ✿ Animal sign such as scat, rubbing, scratching, bites, beds, territory marking, etc.

Course date: May 5, 2012 8am to 2pm Course fee : \$40
Registration for this course will be handled through the YMCA Open University at www.vtymca.org.

Location: Christiansburg, VA Enrollment limited to 12

This course is taught by Rob Speiden, who has more than 15 years experience in tracking services. He has studied from many well known tracking teachers and has been evaluated and certified by Cybertracker Conservations as Tracker III. Rob is the author of Foundations for Awareness, Signcutting & Tracking and currently teaches tracking courses around the U.S. through the Natural Awareness Tracking School, LLC.

Presents:

TRACK & SIGN AGING

This one-day course will be an exploration of one of the most difficult topics in tracking. Track and sign aging is a critical element in a tracker's knowledge and experience. Through a brief classroom session and an in-depth field course, the students will be exposed to aging phenomenon in tracks, discarded debris and sign that are hours, days, weeks and months old. Tools and techniques will be discussed such as baseline, indexing, bracketing as well as practice exercises that can be continued by the students when they return from the course.

Course date: May 6, 2012 (9am - 4pm) Course fee : \$65

Location: Christiansburg, Virginia Enrollment limited to 10

Presents:

SCIENCES of LAND NAVIGATION

(Basic Orienteering with Map & Compass Intensive course)

This course is designed for military, law enforcement, search and rescue volunteers, competitive orienteering or any person that may find themselves working or playing outdoors. While GPSs are nice to have, map and compass skills are essential to anyone that may venture off road. This course will provide a thorough classroom introduction and practical field exercises to improve your understanding of and ability to use topographic maps in conjunction with a compass. The combination of these resources and the skills taught in this class will give you a confident boost in your navigational skill set.

The following topics will be covered to:

✓ Compass Selection and Use ✓ Understand and visualize three-dimensional topography from a map ✓ Determine your location ✓ Natural navigational aids
✓ Magnetic Declination ✓ Determine the best route to a location ✓ Report your location to command/control ✓ Route/Task Planning ✓ UTM / USNG / MGRS coordinate plotting ✓ Night Land Navigation ✓ and more

Students are welcome (but not required) to bring a GPS to the course if you want to become familiar with that as well. Bring a compass if you have one, and we will have compasses and coordinate plotters for the students to borrow or purchase. For this course students will need to be prepared to be outside.

Location/Dates: San Diego, CA February 17-19, 2012 \$225

Christiansburg, VA February 24-26 November 16-18, 2012 \$195

This course is taught by Rob Speiden, who has more than 25 years experience in outdoor expeditions including teaching search and rescue. Rob currently teaches basic and advanced courses for the Virginia Department of Emergency Management Search and Rescue program and is founder of the Natural Awareness Tracking School, LLC. For more information please visit www.trackingschool.com Register for this course by submitting a registration form with your full course payment or a deposit of \$50.

12

Presents:

ARTS of LAND NAVIGATION

(Advanced Orienteering with map & compass)

This course is designed for law enforcement, search and rescue volunteers or any person that may find themselves working or playing off road. Registration for this course requires prior experience with map and compass but not necessarily from this school. After a short classroom review, we will spend the majority of the course time outside to maximize facilitated practice of your navigation skills. The last day of the course will consist of a challenging test-format challenge to bring it all together.

The intent of this course is to provide education and field exercises to improve your map and compass skills to:

✓ Night Land Navigation ✓ 1:24,000 and 1:50,000 scale map usage ✓ Triangulate your position (section/resection) ✓ Long Distance route planning ✓ Easy ways to remember to convert true to magnetic bearings ✓ more Natural navigational aids ✓ Individual test challenge ✓ and more depending on students' interest

Course dates & fee:

March 17-18, 2012 \$150

Location: Christiansburg, VA

December 7-9, 2012 \$225

Enrollment limited to 9

This course is taught by Rob Speiden, who has more than 20 years experience in outdoor expeditions including teaching search and rescue. Rob currently teaches basic and advanced courses for the Virginia Department of Emergency Management Search and Rescue program and is founder of the Natural Awareness Tracking School, LLC. Presents:

G.P.S. for the Technically Challenged

(Global Positioning System)

Whether your department purchased a new GPS, you got one because everybody else has one, or you would like to enter a geocache coordinate and “go to there”. This course introduces basic functions of GPS receivers and how to use them to do the following tasks:

- ✱ How GPS works
- ✱ Marking waypoints
- ✱ Plug in coordinate and go to location
- ✱ Lat/Lon and UTM/MGRS coordinate systems
- ✱ Integrating GPS use with map navigation
- ✱ Recording travels as a track line
- ✱ Download track line into mapping software
- ✱ and more depending on students' interests

Course dates: July 15, 2012 Course fee : \$50

Location: Christiansburg, VA Enrollment limited to 10

This course is taught by Rob Speiden, whose technological expertise is combined with outdoor experience to produce an excellent course on the use of GPS technology. Rob has taught GPS courses to fire departments, sheriff's deputies, search and rescue volunteers and the general public. He currently teaches basic and advanced search and rescue courses for the Virginia Department of Emergency Management Search and Rescue program and is founder of the Natural Awareness Tracking School, LLC. For more information please visit www.trackingschool.com Register for this course by submitting a registration form with your non-refundable full course payment.

Presents:

Search & Rescue for the First Responder

This course is designed for law enforcement and emergency services personnel who are the first responders to a search and rescue (SAR) incident. The intent of the course is to provide enough tools to adequately evaluate an incident and to take appropriate initial actions. The basics of search planning and tactical operations are presented. Specialized resources and their appropriate use are discussed. Students will need to be prepared to be outside both days.

Course dates: Requested by Department **Course fee:** provided upon request
Location: Requested by Department **Enrollment limited to 30**

First Responders are instructed in aspects of search and rescue (SAR) operations by exploring the following subjects:

- ✱ Defining the search area
- ✱ Containment
- ✱ Lost person behavior
- ✱ Specialized resources
- ✱ Land Navigation

- ✱ Search operations and tactics
- ✱ Clue Awareness for Search Teams
- ✱ Patient packaging & evacuation
- ✱ Suspending the search
- ✱ Short search simulation
- ✱ and more

This course is taught by the Natural Awareness Tracking School. The school's founder and lead instructor, Rob Speiden, has been a search and rescue (SAR) volunteer since 1993. Rob has contributed to the successful conclusion of nearly one hundred fifty searches for missing persons in the mid-Atlantic region. He is the author of Foundations for Awareness, Signcutting & Tracking and currently teaches basic and advanced search and rescue courses for the Virginia Department of Emergency Management Search and Rescue program. For more information please visit www.trackingschool.com

Presents:
Clue Awareness for Search Teams

This train-the-trainer formatted presentation is intended for everyone to take back and deliver to their teams. This training has been designed to introduce everyone from novice to incident commander levels of understanding on how to effectively search for and manage clues. This presentation has been well received by thousands of professionals in the SAR community from Virginia to California.

Topics covered in the instructor's manual and take-home power point presentation include but are not limited to:

- ✓ **Defining Clues, sign, tracks**
- ✓ **Negative effects on searcher awareness**
- ✓ **Ways to increase searcher awareness**
- ✓ **Using the senses on a search task**
- ✓ **Track trap information**
- ✓ **Optimizing the use of a flashlight**
- ✓ **Effects of a clue on the expanding search area**
- ✓ **A field exercise to practice and discuss all of the above**

This course was developed by Greg Fuller and Rob Speiden. Rob is the instructor for this workshop and is the founder and lead instructor of the Natural Awareness Tracking School. He has been an active search and rescue (SAR) volunteer since 1993. Rob has contributed to the successful conclusion of well over one hundred searches for missing persons in the mid-Atlantic region. He is the author of Foundations for Awareness, Signcutting & Tracking and currently teaches basic and advanced search and rescue courses for the Virginia Department of Emergency Management Search and Rescue program.

For more information please visit www.trackingschool.com

Presents:

Visual Tracking for Canine Handlers

A person can't move across the ground without leaving scent and tracks. This course introduces and integrates the skill sets used to find and follow the two most common clue types people leave. As William Bodziak writes "If it isn't looked for, it won't be found".

This course is intended to teach visual tracking skills to the scent-discriminating canine handler with classroom presentations and field exercises to cover the following topics and more:

- ✓ **Finding latent foot prints**
- ✓ **Aging tracks**
- ✓ **Signcutting search tactics**
- ✓ **Night tracking**
- ✓ **Tactical team formations**
- ✓ **Integrating visual & canine tracking resources**
- ✓ **Field simulation of manhunt**

This course is taught by the Natural Awareness Tracking School instructor cadre. These instructors have over 50 years combined experience in law enforcement, search and rescue and corrections applications of tracking skills. This course has been taught for the Virginia Department of Corrections for several years. Contact us to arrange this course for your officers & searchers. For more information please visit www.trackingschool.com

Presents:

SHORT-TERM WILDERNESS SURVIVAL

This two-day course is intended as an introduction to survival skills for those that do not expect to find themselves in survival situations. It does not cover long-term survival practices. Students will need to be prepared to be outside both days, including an overnight bivouac. This class, consisting of professional classroom presentations and outside field exercises, will discuss and practice the following topics:

- ✱ **Shelter construction**
- ✱ **Fire-making**
- ✱ **Water acquisition**
- ✱ **Priorities in survival situations**
- ✱ **Wilderness Dis-eases**
- ✱ **10 essentials—survival equipment**
- ✱ **Navigation with natural aids**
- ✱ **Overnight bivouac in your shelter**
- ✱ **Preventative Search & Rescue**
- ✱ **and more depending on students' interests.**

Course dates: To Be Determined

Course fee : TBD

Location: TBD

This course is taught by Rob Speiden, who has been participating in and leading outdoor expeditions since he was a child. These experiences include family horse-packing expeditions, Outward Bound assistant instructor, and a veteran search and rescue volunteer and instructor. He currently teaches basic and advanced courses for the Virginia Department of Emergency Management Search and Rescue program and is founder of the Natural Awareness Tracking School.

For more information please visit www.trackingschool.com.

Presents:

Introduction to Edible & Medicinal Plants

The world of tasty, edible plants includes more than what you can find in the grocery store – some of them are growing right outside your door! If you're interested in issues of health and sustainability or if you'd enjoy a themed hike, this is a class is for you. There will be an inside class portion and a short outside walk so be prepared for the weather. Any person under 18 wishing to attend the class much be accompanied by a legal guardian.

Rob Speiden will guide this exploration of the wild edible and medicinal plants you can pick to eat, or use to treat the symptoms of common illnesses like colds, sore throats or bee stings. Poisonous look-alike plants will also be identified and discussed.

Course date: May 5, 2012 (8 - 11am) Course fee : \$20

Location: Christiansburg, VA Enrollment limited to 15

Registration for this course will be handled through the YMCA Open University at www.vtymca.org.

This course is taught by Rob Speiden, founder of the Natural Awareness Tracking School. Growing up on a farm eating more than was served at the table was Rob's introduction to edible & medicinal plants before being educated by a myriad of experienced elders. Rob has spent decades enjoying the outdoors and its bounty; he teaches survival and tracking skills to Search and Rescue volunteers and the public nationwide.

For more information please visit the Natural Awareness Tracking School website at www.trackingschool.com.

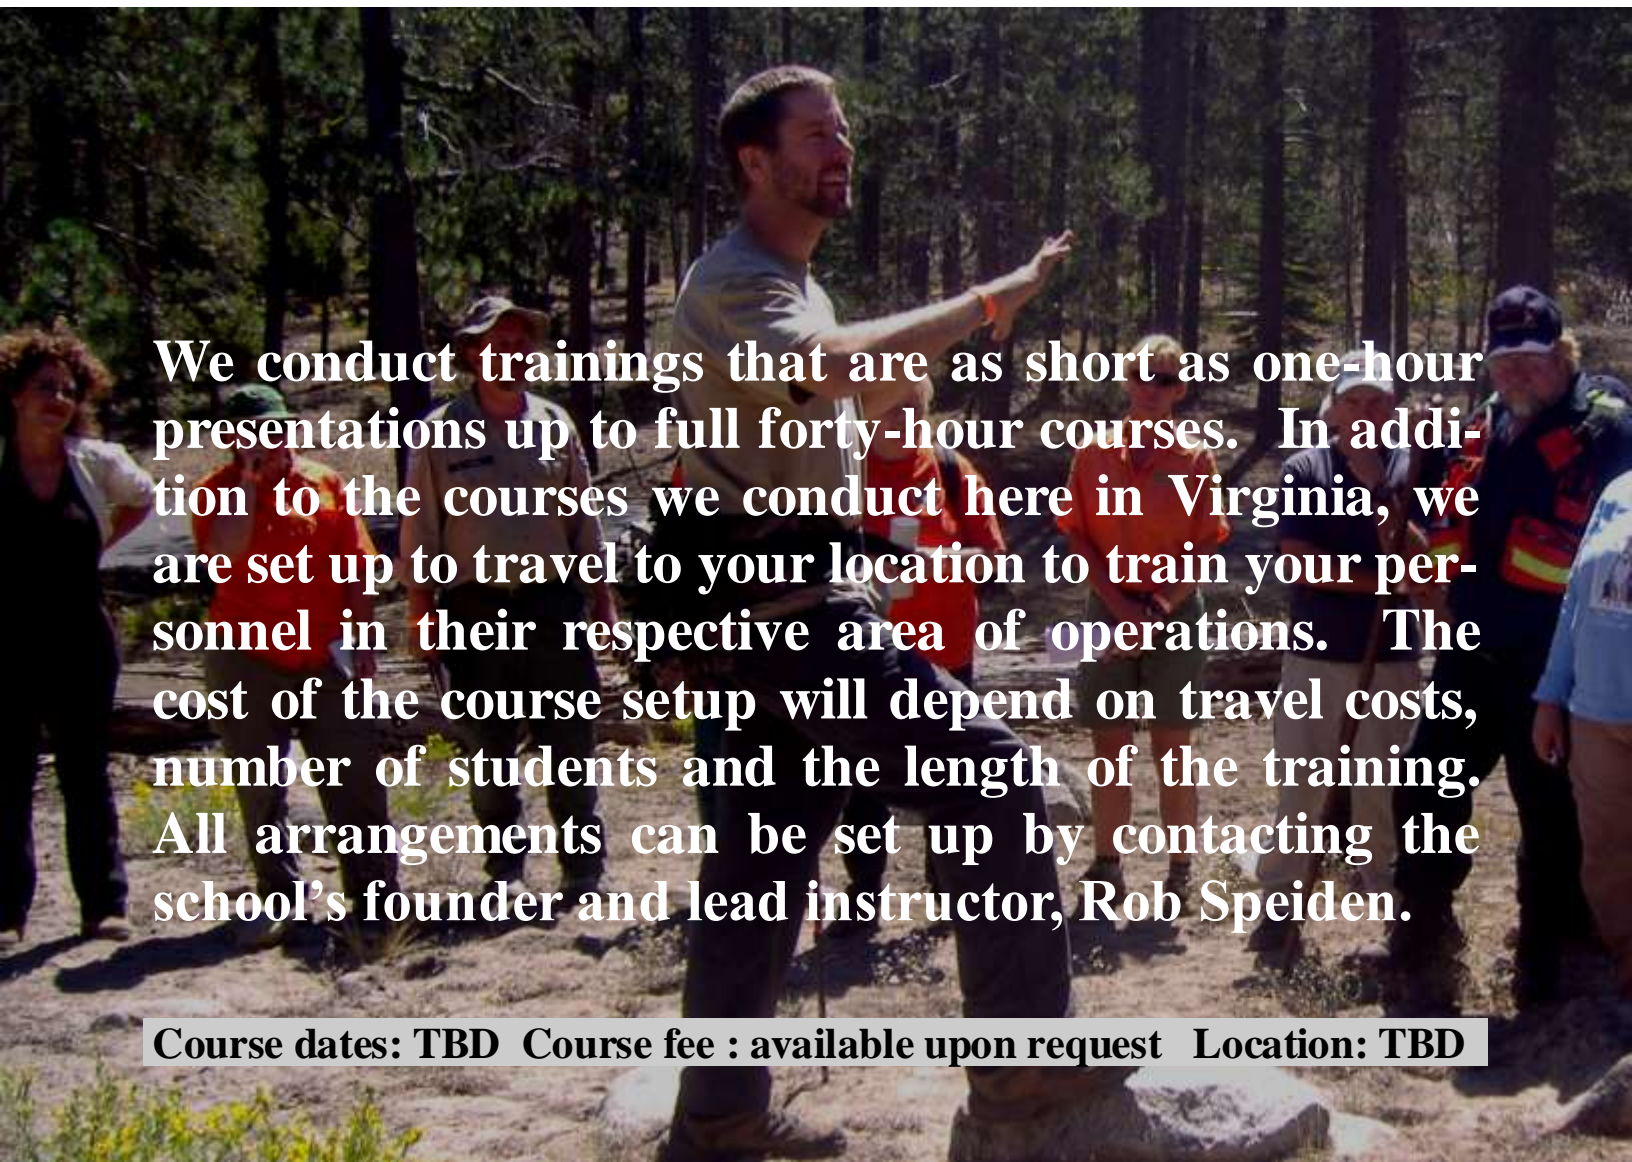

Presents:

CUSTOM TRAINING COURSES

Any topic in this catalogue can be set up as a custom training for you and/or your personnel. Groups sizes are typically 1 to 10, but classes can also be arranged for larger groups. This school prefers to maintain a superior student to instructor ratio of not more than 6 to 1 to maximize the students' learning experience.

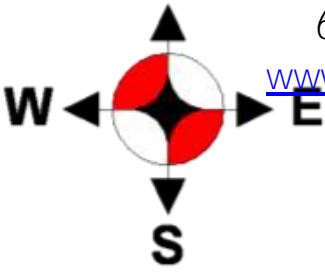

We conduct trainings that are as short as one-hour presentations up to full forty-hour courses. In addition to the courses we conduct here in Virginia, we are set up to travel to your location to train your personnel in their respective area of operations. The cost of the course setup will depend on travel costs, number of students and the length of the training. All arrangements can be set up by contacting the school's founder and lead instructor, Rob Speiden.

RELEASE WAIVER

You must sign an original copy of waiver to be admitted to class. If you do not mail a signed copy prior to class you will be required to sign upon arrival.

In all classes, demonstrations and excursions conducted by Robert Speiden, the Natural Awareness Tracking School, LLC and its STAFF, (hereinafter, NATSllc), reasonable care is taken to prevent serious injuries and to minimize accidents. The PARTICIPANT states the he/she is fully aware that tracking, awareness, land navigation and similar training, even under the safest conditions possible, may be dangerous, and the PARTICIPANT hereby agrees to knowingly and voluntarily accept full responsibility and assume all risks, including those caused by acts of God, injury, death, and/or loss to his/her person and/or property. The PARTICIPANT agrees to obey the rules and regulations set down by NATSllc in order to minimize these risks.

The PARTICIPANT knowingly, voluntarily, and irrevocably waives any and all past, present, and/or future injuries, death, or loss, including those caused by acts of God, received while participating in activities conducted by NATSllc as a student, participant, spectator, and/or visitor, or in any other manner or form, taking part in the exercises, practices, excursions, and/or demonstrations of said tracking, awareness and similar training. The PARTICIPANT certifies that he/she is physically capable to participate in the said tracking, awareness and similar training program despite the rigors and dangers inherent in such an undertaking. The PARTICIPANT accepts all responsibility for any injury, death, and/or loss to his/her person or property, including by acts of God, for the rigors and dangers inherent in this undertaking. The participant acknowledges that the use of video recorders is prohibited. The PARTICIPANT releases to NATSllc rights to use any photograph, video and/or audio recording taken while participating in said tracking, awareness and similar training, to be used as deemed by NATSllc, including advertising without compensation or remuneration. Prices and policies are subject to change without notice.

I have read the Natural Awareness Tracking School, LLC registration policy and Release Waiver and acknowledge that I understand and agree to terms as outlined.

My signature below indicates my acceptance of these terms and my desire to participate in the Natural Awareness Tracking School, LLC courses.
